Summary

Yelloweye Rockfish Conservation Areas (YRCA), Conservation Area to protect depleted rockfish

Description

This dataset depicts the boundaries of the Newport Yelloweye Rockfish Conservation Area (YRCA) off central Oregon.

Credits

National Oceanic and Atmospheric Administration (NOAA) Fisheries, Sustainable Fisheries Division

Use limitations

This shapefile includes boundaries for the following Groundfish Conservation Area: Newport Yelloweye Rockfish Conservation Area (YRCA). Because GIS projection and topology functions can change or generalize coordinates, these GIS files are considered to be approximate representations and are NOT an OFFICIAL record for the exact regulated area boundaries. For information on the official legal definition refer to the Code of Federal Regulations (eCFR §660.70(h))

Description of values ⇌
Coordinates defining the features.

Field Shape_Leng ▶

Alias ⇌ Shape_Leng
Data type ⇌ Double
Width ⇌ 19
Precision ⇌ 0
Scale ⇌ 0

Field Shape_Area ▶

Alias ⇌ Shape_Area
Data type ⇌ Double
Width ⇌ 19
Precision ⇌ 0
Scale ⇌ 0

Field description ⇌
Area of feature in internal units squared.

Description source ⇌
Esri

Description of values ⇌
Positive real numbers that are automatically generated.

Field Site_Name ▶

Alias Site Name

Data type String
Width 255

Field description
Site name as defined in regulation

Description source
See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown

Field Area_Km2 ►

Alias Area Km2
Data type Double

Field description
Area in km² calculated using the Geodesic method

Description source
See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown

Field EffFrom ►

Alias Effective From
Data type Date

Field description
Date that area became effective

Description source
See Credits under Item Description in the metadata record for definition and source information

Field Constancy ►

Alias Constancy
Data type String
Width 50

Field description
Defines whether there are temporal gaps in effectiveness

Description source
See Credits under Item Description in the metadata record for definition and source information

Field SEffFrom ►

Alias Seasonal Effective From
Data type Date

Field description
Date effective from, seasonal

Description source

See Credits under Item Description in the metadata record for definition and source information

Field SEffTo ►

Alias Seasonal Effective To

Data type Date

Field description

Date effective to, seasonal

Description source

See Credits under Item Description in the metadata record for definition and source information

Field Permanance ►

Alias Permanance

Data type String

Width 50

Field description

Defines how long an area is intended to be effective

Description source

See Credits under Item Description in the metadata record for definition and source information

List of values

Value Conditional

Description Conditional

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Value Permanent

Description Permanent

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Value Temporary

Description Temporary

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Field EffTo ►

Alias Effective To

Data type Date

Field description

Date area became inactive, vacated, or sunsetted

Description source

See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown

Field Status ►

Alias Status

Data type String
Width 50

Field description
Effectiveness status of the area

Description source
See Credits under Item Description in the metadata record for definition and source information

List of values

Value Active

Description Active

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Value Inactive

Description Inactive

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Value Vacated

Description Vacated

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Value Sunset

Description Sunset

Enumerated domain value definition source See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown

Field Site_ID ►

Alias Site ID

Data type String

Width 12

Field description
Unique ID for each area

Description source
n/a

Measurement frequency not planned

Field AltName ►

Alias Alternate Name

Data type String

Width 255

Field description
Alternate site name if needed

Description source
See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown

Field Area_Group ▶

Alias Area Group
Data type String
Width 255

Field description

An identifier that can be used to group areas together

Description source

See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown

Field Area_Nm2 ▶

Alias Area nm2
Data type Double

Field description

Area_Km2 converted to nm^2

Description source

See Credits under Item Description in the metadata record for definition and source information

Measurement frequency unknown
