## 1. Introduction

Atlantic highly migratory species (HMS) including tunas, swordfish, sharks, and billfish are managed by the National Marine Fisheries Service (NMFS) under the authority of the Secretary of Commerce, with consideration for the domestic and international aspects of these fisheries.

NMFS has recently amended fisheries regulations for international trade of Atlantic bluefin tuna to implement the International Commission for the Conservation of Atlantic Tunas (ICCAT) electronic bluefin tuna catch documentation system (eBCD system). HMS international trade permit (ITP) holders who import, export, or re-export Atlantic bluefin tuna will be required to complete all relevant trade documentation in the eBCD system. This guide walks HMS ITP holders through setting up an account in the eBCD system and completing the required electronic bluefin tuna catch documents (eBCDs).

This guide is intended to provide a plain-language summary of how to comply with the new regulations and is produced in compliance with Section 212 of the Small Business Regulatory Enforcement Fairness Act. For the official and complete set of regulations, please see 50 CFR Part 300 and other relevant parts of the Code of Federal Regulations (CFR) and the *Federal Register* (FR) (electronic versions of both the CFR and FR are available at [www.gpo.gov/fdsys](http://www.gpo.gov/fdsys)). Since fishery rules frequently change, fishermen must familiarize themselves with the latest regulatory updates and are responsible for complying with the current official regulations. If there is a discrepancy between the regulations in 50 CFR Part 300 or other applicable CFR parts and the information in this guide, the regulations will take precedence. This guide supplements applicable sections of the HMS Compliance Guides published in January 2016, until an update of the Compliance Guides with eBCD system information is published.

All measures included in the final rule implementing the eBCD system are effective **May 1, 2016**.

For further information on regulatory requirements, please contact the NMFS HMS Management Division at (301) 427-8503 or visit the HMS website at [www.nmfs.noaa.gov/sfa/hms](http://www.nmfs.noaa.gov/sfa/hms).

For questions on use of the eBCD system, please contact customer service at (301) 427-8589 or [nmfs.ebcd@noaa.gov](mailto:nmfs.ebcd@noaa.gov), 8:00 am to 6:00 pm, Eastern Time, 7 days a week.

This manual displays a test account for user “Jack Crevalle,” an Operator at “ABC Fish Company” and a Western Atlantic bluefin tuna importer and exporter.

Disclaimer: Screenshots contained in this document are subject to change. Revisions to this document will be periodically made and posted on the HMS website.

**IMPORTANT NOTE ON VALIDATION:** eBCDs documenting tagged bluefin tuna are exempt from validation requirements. If you inadvertently select “send for validation” you will lose that exemption and you will have to wait for the government authority to validate the eBCD. Please take care not to send eBCDs with tagged bluefin tuna for validation.

## **2. List of Commonly Used Acronyms**

BCD: bluefin tuna catch document

BFTRC: bluefin tuna re-export certificate

CPC: ICCAT Contracting Parties and Cooperating non-Contracting Parties, Entities or Fishing Entities

eBCD: electronic bluefin tuna catch document

eBCD system: electronic bluefin tuna catch documentation system

HMS: highly migratory species

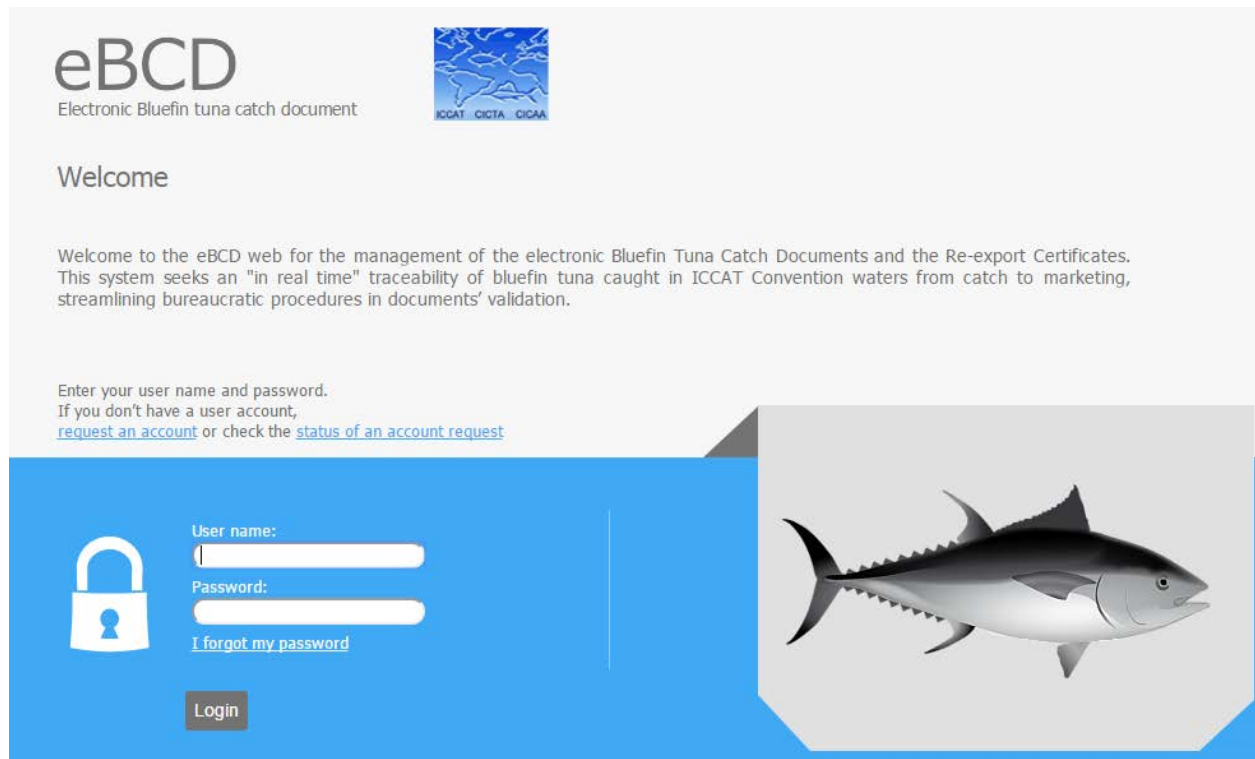

ICCAT: International Commission for the Conservation of Atlantic Tunas

ITP: international trade permit

NMFS: National Marine Fisheries Service

WBFT: Western Atlantic bluefin tuna

### 3. Welcome to the eBCD System

eBCD  
Electronic Bluefin tuna catch document

ICCAT CICTA CIGAA

## Welcome

Welcome to the eBCD web for the management of the electronic Bluefin Tuna Catch Documents and the Re-export Certificates. This system seeks an "in real time" traceability of bluefin tuna caught in ICCAT Convention waters from catch to marketing, streamlining bureaucratic procedures in documents' validation.

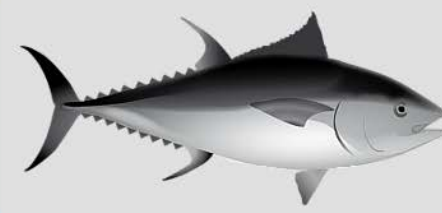

Enter your user name and password.  
If you don't have a user account,  
[request an account](#) or check the [status of an account request](#)

User name:

Password:

[I forgot my password](#)

Login

The eBCD system website can be found at <https://etuna.iccat.int>.

NMFS will assist you with the setup of user accounts for HMS ITP holders who trade Atlantic bluefin tuna. Your company is listed in the system with the contact information and email address you provided to us in 2015. Some of you may have already provided information for user accounts and those will be activated before May 1, 2016. If you have not received a user name and/or password, you can request an account online through the eBCD system website (see Request a User Account) or contact customer service at (301) 427-8589 or [nmfs.ebcd@noaa.gov](mailto:nmfs.ebcd@noaa.gov).

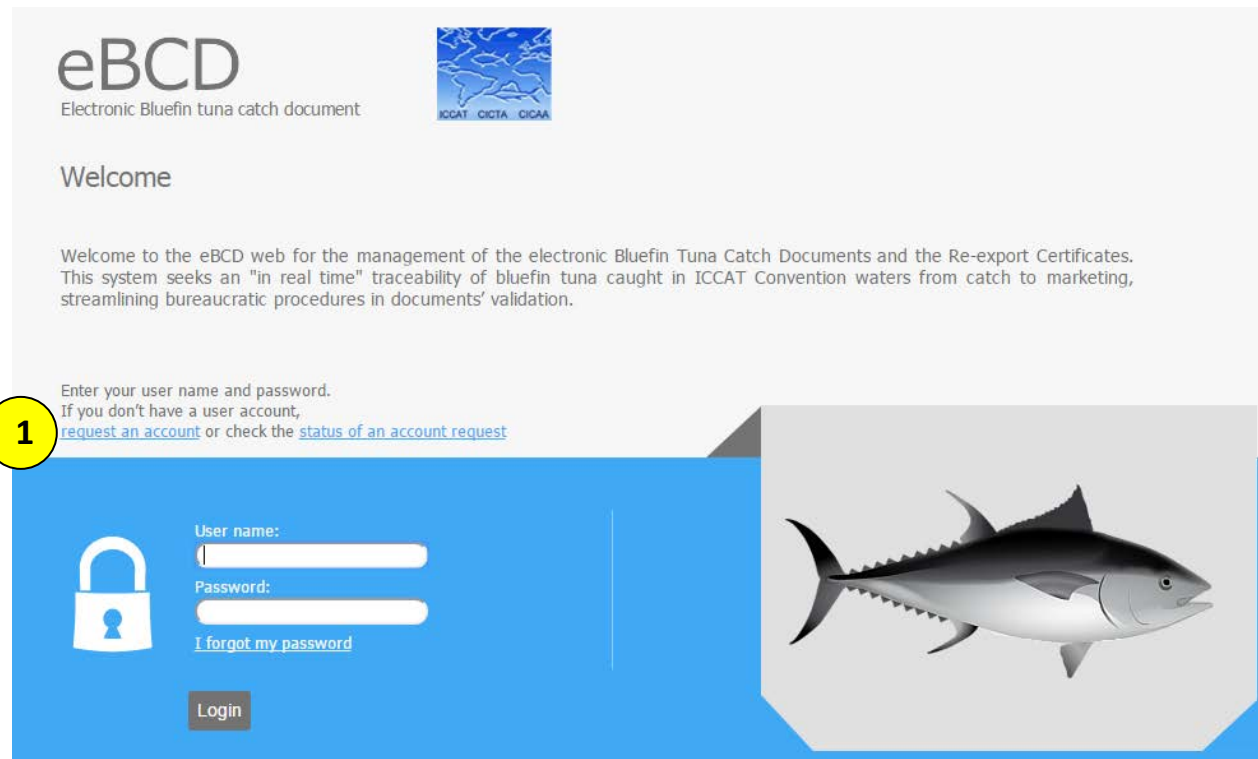

Once you have your user name and password, you can log in to your account from the main page. You will enter the eBCD system on the below home page.

### Frequent operations

Below you will find links to the most usual operations.

## 4. Request a User Account

The screenshot shows the eBCD website interface. At the top left, the logo "eBCD" is displayed with the text "Electronic Bluefin tuna catch document" below it. To the right is a blue map icon with the text "ICCAT CICTA CICA" underneath. Below the logo, the word "Welcome" is centered. A paragraph of text follows: "Welcome to the eBCD web for the management of the electronic Bluefin Tuna Catch Documents and the Re-export Certificates. This system seeks an 'in real time' traceability of bluefin tuna caught in ICCAT Convention waters from catch to marketing, streamlining bureaucratic procedures in documents' validation." Below this text, a yellow circle with the number "1" highlights the instruction: "Enter your user name and password. If you don't have a user account, [request an account](#) or check the [status of an account request](#)". The main content area has a blue background. On the left, there is a white padlock icon. To its right are two white input fields labeled "User name:" and "Password:". Below the password field is a link that says "I forgot my password". At the bottom left of this section is a brown "Login" button. On the right side of the blue area, there is a 3D illustration of a bluefin tuna fish.

1. On the main page, click on “request an account.”

Once you have requested a user account, or once NMFS creates an account for you, you will receive an email notification that the request is pending authorization by the CPC Administrator (in this case, NMFS; see below). The email will include a link where you can check the status of your request using the identifier provided.

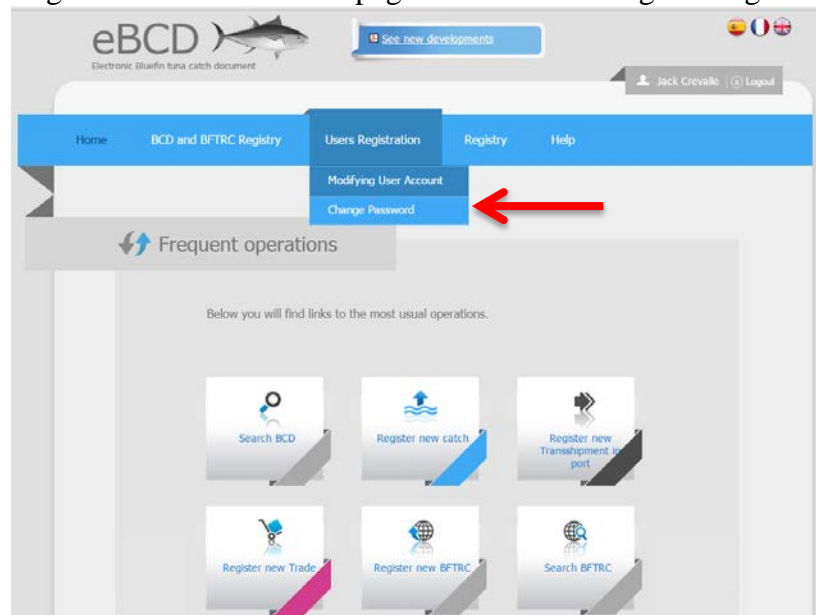

NOTE: All communications from the eBCD system will contain text repeated in English, Spanish, and French.

Once the CPC Administrator authorizes your user account, you will receive an email with your user name and temporary password (see below). HINT: When you log in to your account using this password, it is easiest to copy the password from your email and paste it into the field.

When you log in for the first time, you can change your password by selecting "Users Registration" on the home page and then selecting "Change Password" (see below).

## 5. View and Modify Your User Account Information

The screenshot shows the eBCD user interface. At the top, there is a navigation bar with links for Home, BCD and BFTRC Registry, Users Registration, Registry, and Help. The 'Users Registration' link is highlighted with a yellow circle labeled '1a'. In the top right corner, the user's name 'Jack Crevalle' is displayed with a 'Logout' button, highlighted with a yellow circle labeled '1'. Below the navigation bar, the page title is 'Modifying User Account'. On the left, there is a 'Requests' section with a user icon and a plus sign. The main content area is titled 'User data' and contains a form with the following fields: Name (Jack), Surnames (Crevalle), Title (Mr), Job Title (Operator), Language (English), City (Kingston), Address (123 Amberjack Lane), Postal Code (02582), Phone, Fax, and E-mail (jack@gmail.com). Below the form is a table with the following data:

Access eBCD system as:	Name	ICCAT No. / No N. Registration	Country	Notes
WBFT Importer	ABC FISH COMPANY	SE10999	U.S.A.	
WBFT Exporter	ABC FISH COMPANY	SE10999	U.S.A.	

Below the table is a 'Requests' section with a search bar and the text 'No results found for this search'. Below that is a 'New request' section with a dropdown menu for 'Access eBCD system as:' highlighted with a yellow circle labeled '3'. At the bottom of the page, there is a 'Save' button highlighted with a yellow circle labeled '4'.

1. From the home page, click on your name in the upper right corner. You will come to a page called Modifying User Account.
  - 1a. You can also select “Users Registration” from the menu and then select “Modifying User Account.”
2. Make any necessary changes to your user data.
3. If you wish to add another role to your profile, such as if you registered as a WBFT Exporter and want to add WBFT Importer, go to “New request” and select the role from the drop down menu (see below).
4. Hit Save.

## 6. Create a New eBCD – Catch Information

1a. From the home page menu, select “BCD and BFTRC Registry.” Then select “New BCD.” (The system refers to a BCD, or bluefin tuna catch document, where we use the term eBCD since the documents are created electronically. BFTRC stands for Bluefin Tuna Re-export Certificate.)

1b. You can also select “Register new catch.”

2. On the next screen, enter the date of harvest under Catch Information. Once the date is entered, you will see the below screen. Stock is automatically filled in with “West Bluefin Tuna.”

**Trade companies**

9 Company:   
ABC FISH COMPANY

10 Save

3. Enter Vessel Information using the search function. In the Search field, enter the vessel's name or national registration number.
  - If the vessel is registered in the system, the vessel name and registration number will be populated (see below). All ICCAT registered vessels will already be in the

system. If the vessel is not in the system, you can enter the vessel name and registration number.

**NOTE: Please double check both the vessel name and registration number as there are vessels that have the same or very similar names.**

The screenshot shows two sections of a form. The top section, 'Vessel Information', contains fields for Flag (USA - U.S.A.), Search (11112345 - LADY ANN), Vessel (LADY ANN), National Registration Number (11112345), and Pavilion/CPC (U.S.A.). A yellow circle with the number 3 is placed over the Search field. Below this is a 'Catch' field with the value 250 and a unit dropdown set to Kg, with a yellow circle 4 over it. The bottom section, 'Catch Description', has fields for No. of Fish (2), Total Weight (250,00 Kg), and AVG. Weight (Kg) (125,0 Kg). A yellow circle 5 is over the No. of Fish field. Below these is a 'Notes' text area, a yellow circle 6 is over the 'Area' dropdown menu (set to GOFM - Gulf of Mexico), and a yellow circle 7 is over the 'Gear' dropdown menu (set to BB - Baltboat). There is also an 'Add Tags (if applicable)' button.

4. In the Catch field under Vessel Information, enter the total weight of the bluefin tuna catch in kilograms (Kg). This number will be automatically added to Total Weight under Catch Description (step 5).
5. Under Catch Description, enter the No. of Fish. The AVG. Weight (Kg) will be automatically populated.
6. Select the Area of catch from the drop down menu (see below). Always select “WEST – West Atlantic.”

This is a close-up of the 'Area' dropdown menu from the 'Catch Description' section. The menu is open, showing a list of options: GOFM - Gulf of Mexico, GOFM - Gulf of Mexico, NORT - North Atlantic, NW - Northwest Atlantic, PAC - Pacific, SOUT - South Atlantic, SW - Southwest Atlantic, TROP - Tropical Atlantic, WEST - West Atlantic (highlighted in blue), and WTRO - West Tropical Atlantic. A yellow circle with the number 6 is placed over the dropdown arrow.

7. Select the Gear from the drop down menu (see below).

The screenshot shows the 'Catch Description' section of a form. It includes input fields for 'No. of Fish' (2), 'Total Weight' (250,00 Kg), and 'AVG. Weight(Kg)' (125,0 Kg). There is a 'Notes' text area and a dropdown for 'Area' (WEST - West Atlantic). The 'Gear' dropdown menu is open, showing a list of options: BB - Baitboat, GILL - Gillnet: Drift net, HAND - Handline, HARP - Harpoon (highlighted in blue), HS - Haul Seine, LL - Longline, PS - Purse seine, RR - Rod and Reel, TL - Tended line, TRAP - Trap, TRAW - Trawl, MWT - Trawl: Mid-water pelagic trawl, and TROL - Troll. A yellow circle with the number 7 is placed over the 'HARP - Harpoon' option. Below the gear list is an 'Add Tags (if applicable)' button with a plus sign.

8. Under Catch Description, click on the + symbol next to “Add Tags (if applicable)” to input tag information (see below).

- Enter tag code.
- Enter weight.
- Select product type from the drop down menu: “F – Fresh” or “FR – Frozen”
- Select product presentation from the drop down menu:
  - RD – Rounded weight
  - DR – Dressed weight
  - GG – Gilled & gutted
  - FL – Fillet
  - OT – Other
- Click + Add.

The screenshot shows the 'Manual Input' section of the form. At the top, there are dropdowns for 'Area' (WEST - West Atlantic) and 'Gear' (HARP - Harpoon). Below these is a button labeled '8 Tags (if applicable)' with a plus sign, highlighted by a yellow circle with the number 8. Underneath is an 'Import File' section with an 'Import CSV file' button. The 'Manual Input' section contains the following fields: 'Tag Code' (05-99999), 'Weight' (150,00 Kg), 'Product type' (F - Fresh), and 'Product presentation' (DR - Dressed weight). At the bottom of this section is an 'Add' button with a plus sign.

- Once you click Add, the tag information will be displayed in a table.

**8** Tags (if applicable)

▶ Import File

▶ Manual Input

Tag Code

Weight  ,  Kg

Product type

Product presentation

Add

Tag Code	Weight	Product type	Product presentation		
05-99999	150 Kg	F - Fresh	DR - Dressed weight		

- If you have more than one bluefin tuna, you can enter information for other tags following the same steps. In this example, there were two bluefin tuna so information was entered for two tags.

**8** Tags (if applicable)

▶ Import File

▶ Manual Input

Tag Code

Weight  ,  Kg

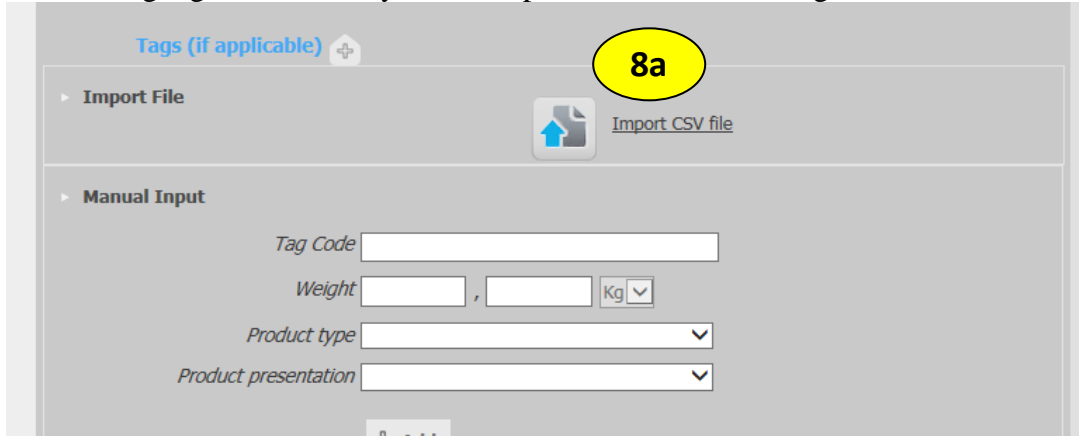

Product type

Product presentation

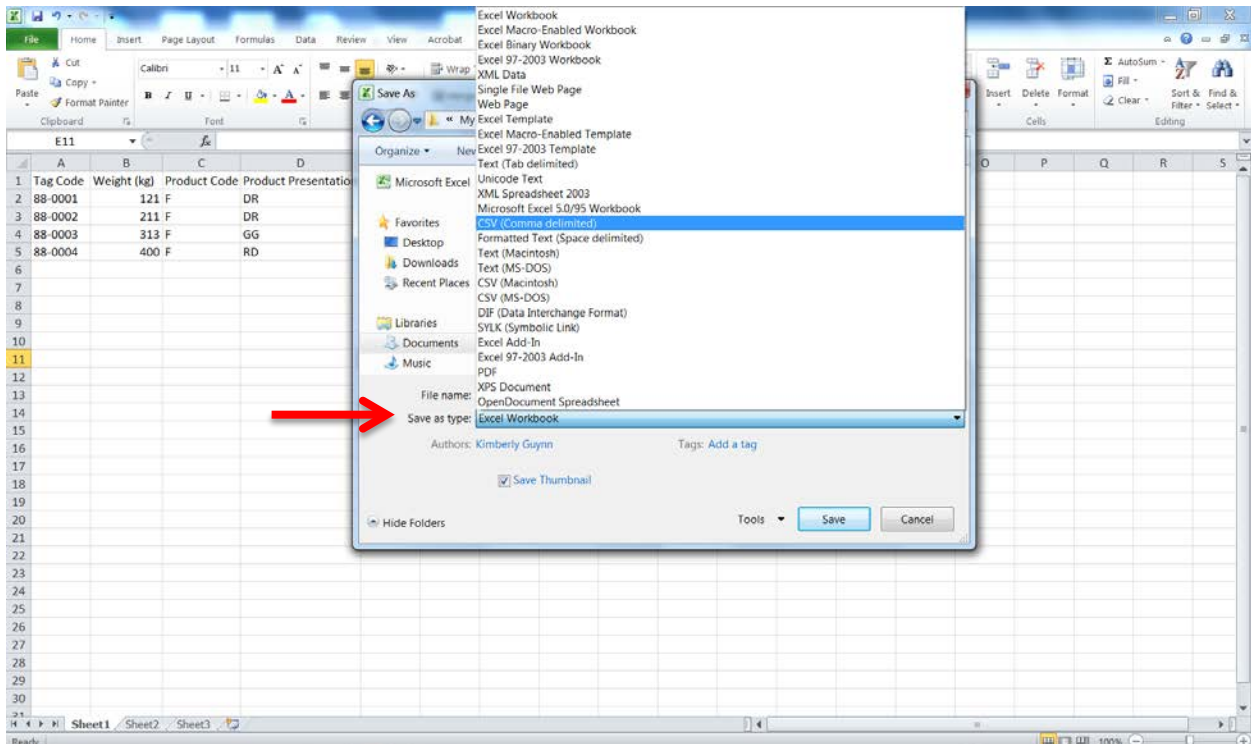

Add

Tag Code	Weight	Product type	Product presentation		
05-99999	150 Kg	F - Fresh	DR - Dressed weight		
05-99991	100 Kg	F - Fresh	DR - Dressed weight		

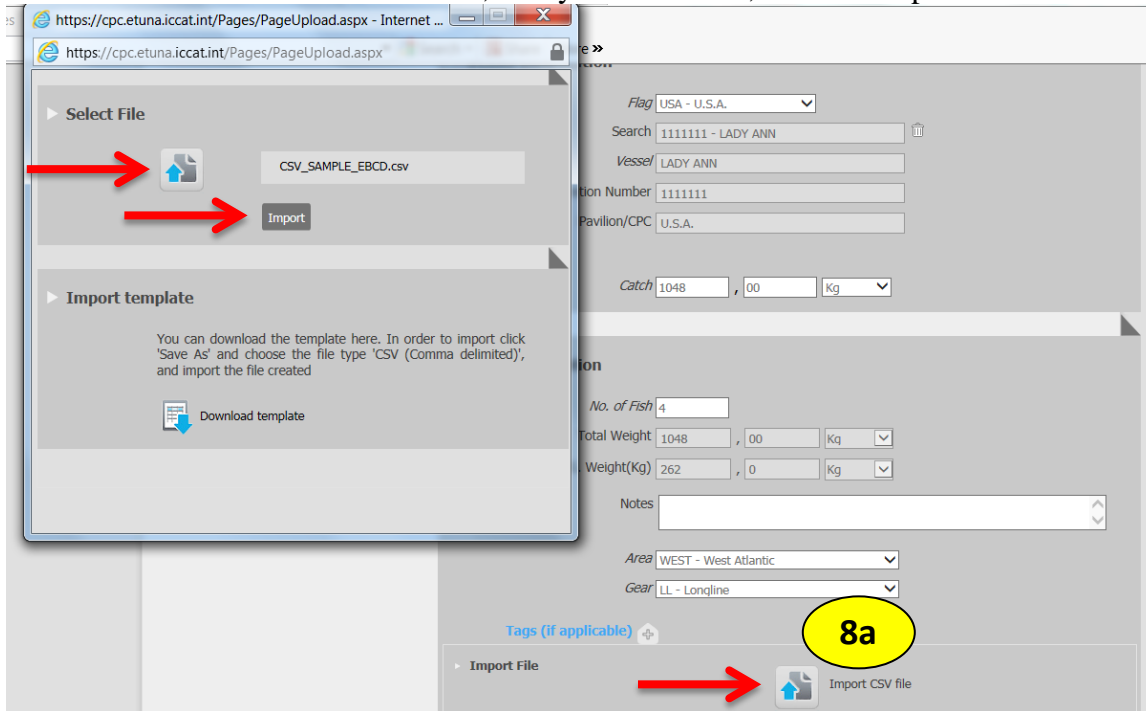

8a. Alternatively, if you have a number of tagged bluefin tuna to enter, rather than manually entering tag information, you can import a CSV file with tag information.

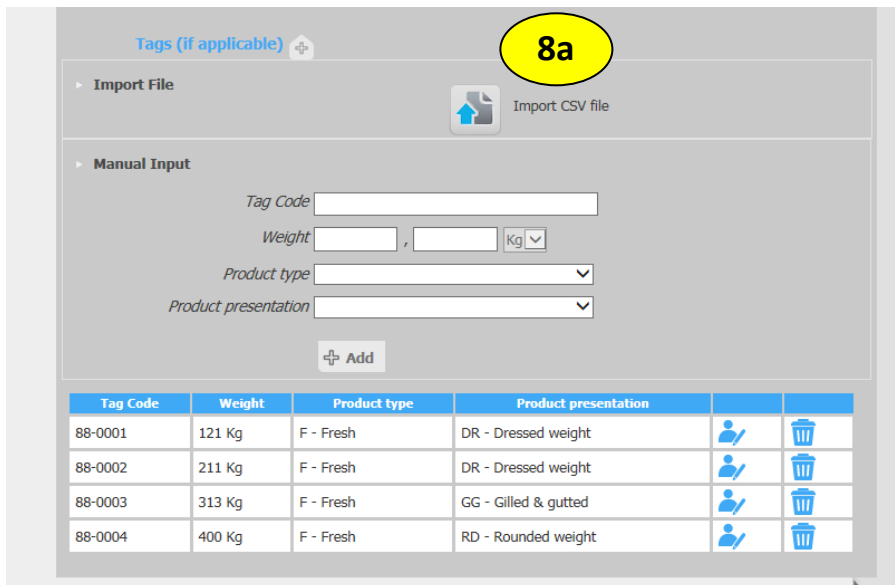

- To create a CSV file, enter your tag information into a Microsoft Excel spreadsheet, including tag code, weight (kg), product type, and product presentation. When you save the file, go to “Save as type” and change it from the default (“Excel Workbook”) to “CSV (Comma delimited)” (see below).

- Click on the icon next to “Import CSV file.” On the pop up screen under “Select File” click on the icon, find your saved file, and click Open. Then click Import.

- The information will be display in a table (below), as in step 8.

9. Under Trade companies, the company that is associated with your user account will already be populated.

- Once you hit Ok, you will see your eBCD number, or code, on the next screen (see below; in this example the code is US15900001).
- You will also see a message (in green below) saying that, since the bluefin tuna listed in the eBCD are tagged, it is exempted from the validation requirement.

**NOTE: If you inadvertently click “send for validation” you will have to wait until the government authority clears the eBCD.**

11. You can print your eBCD from this screen for your records. It will appear as below:

1. ICCAT BLUEFIN TUNA CATCH DOCUMENT (BCD)				N°:	US15900001	1 / 1
<b>2. CATCH INFORMATION</b>						
VESSEL / TRAP INFORMATION						
NAME OF THE CATCHING VESSEL / TRAP		Flag/CPC	NATIONAL REGISTRATION No.	INDIVIDUAL QUOTA	CATCH

05-99999		150	F-Fresh	DR-Dressed weight		
05-99991		100	F-Fresh	DR-Dressed weight		

## Troubleshooting Potential Errors in the Catch Section

### a) Entering the wrong weight for a tagged fish

A user might make a mistake entering the weight for a tagged fish, for example by entering the weight in pounds rather than kilograms. In this example, the user incorrectly entered a weight of 320 Kg for the bluefin tuna with tag number 06-0004 (as in step 8, page 16) when the fish actually weighed 150 Kg.

If you enter the wrong weight, you can correct your entry by clicking on the edit icon in the table, which looks like a person holding a pen (see below).

Manual Input

Tag Code

Weight  ,  Kg

Product type

Product presentation

Tag Code	Weight	Product type	Product presentation		
06-0001	110 Kg	F - Fresh	DR - Dressed weight		
06-0002	90 Kg	F - Fresh	DR - Dressed weight		
06-0003	200 Kg	F - Fresh	DR - Dressed weight		
06-0004	320 Kg	F - Fresh	DR - Dressed weight		

The entry will open in the fields above the table.

Manual Input

 Tag Code

Weight  ,  Kg

Product type

Product presentation

Tag Code	Weight	Product type	Product presentation		
06-0001	110 Kg	F - Fresh	DR - Dressed weight		
06-0002	90 Kg	F - Fresh	DR - Dressed weight		
06-0003	200 Kg	F - Fresh	DR - Dressed weight		

You can change the weight to the correct weight and then click + Add.

Manual Input

Tag Code

Weight  ,  x

Product type

Product presentation

Tag Code	Weight	Product type	Product presentation		
06-0001	110 Kg	F - Fresh	DR - Dressed weight		
06-0002	90 Kg	F - Fresh	DR - Dressed weight		
06-0003	200 Kg	F - Fresh	DR - Dressed weight		

The corrected entry will be added back to the table.

Manual Input

Tag Code

Weight  ,  Kg

Product type

Product presentation

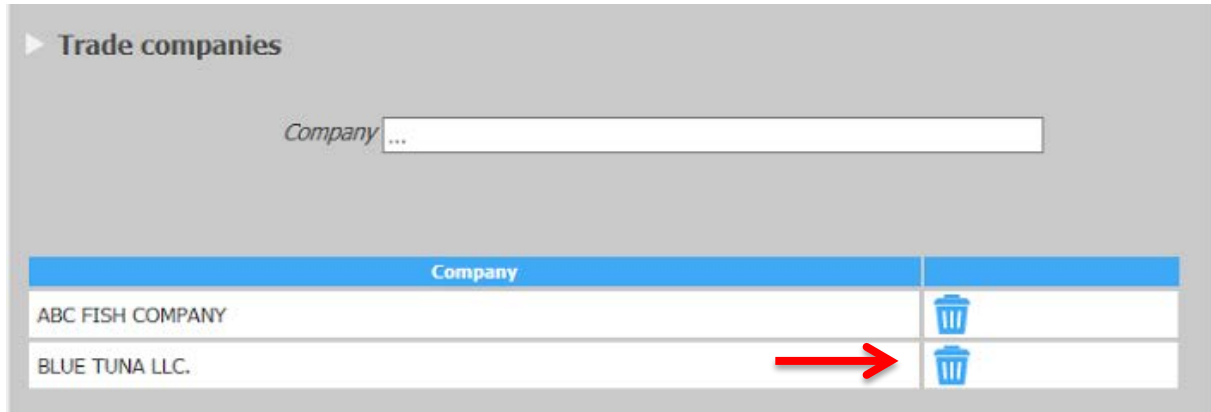

Tag Code	Weight	Product type	Product presentation		
06-0001	110 Kg	F - Fresh	DR - Dressed weight		
06-0002	90 Kg	F - Fresh	DR - Dressed weight		
06-0003	200 Kg	F - Fresh	DR - Dressed weight		
06-0004	150 Kg	F - Fresh	DR - Dressed weight		

*b) Listing more than one company*

If you have more than one company associated with your user account, all companies will be listed under Trade Company as you are creating the eBCD (as in step 9, page 20).

To delete all companies other than the one associated with this eBCD, you can click on the trash can next to the other company (or companies) in the table (see below). In this example, the user is associated with both ABC Fish Company and Blue Tuna LLC, but the user is preparing the eBCD for ABC Fish Company.

Only the relevant company will remain in the table.

c) Entering more or fewer tags than the number of fish claimed

On the eBCD, you must enter the number of fish you are documenting in step 5 (page 15). You cannot enter tag information for more fish than you indicated in the previous step. In this example, the user entered 4 for the number of fish, but then entered five tags (as in step 8, page 16). The system will allow you to add an extra tag to the table, but when you try to save the document, you will receive an error message (see below).

Manual Input

Tag Code

Weight  ,  Kg

Product type

Product presentation

Tag Code	Weight	Product type	Product presentation		
06-0001	110 Kg	F - Fresh	DR - Dressed weight		
06-0002	90 Kg	F - Fresh	DR - Dressed weight		
06-0003	200 Kg	F - Fresh	DR - Dressed weight		
06-0004	150 Kg	F - Fresh	DR - Dressed weight		
06-0005	100 Kg	F - Fresh	DR - Dressed weight		

Manual Input

Tag Code

Weight  ,  Kg

Product type

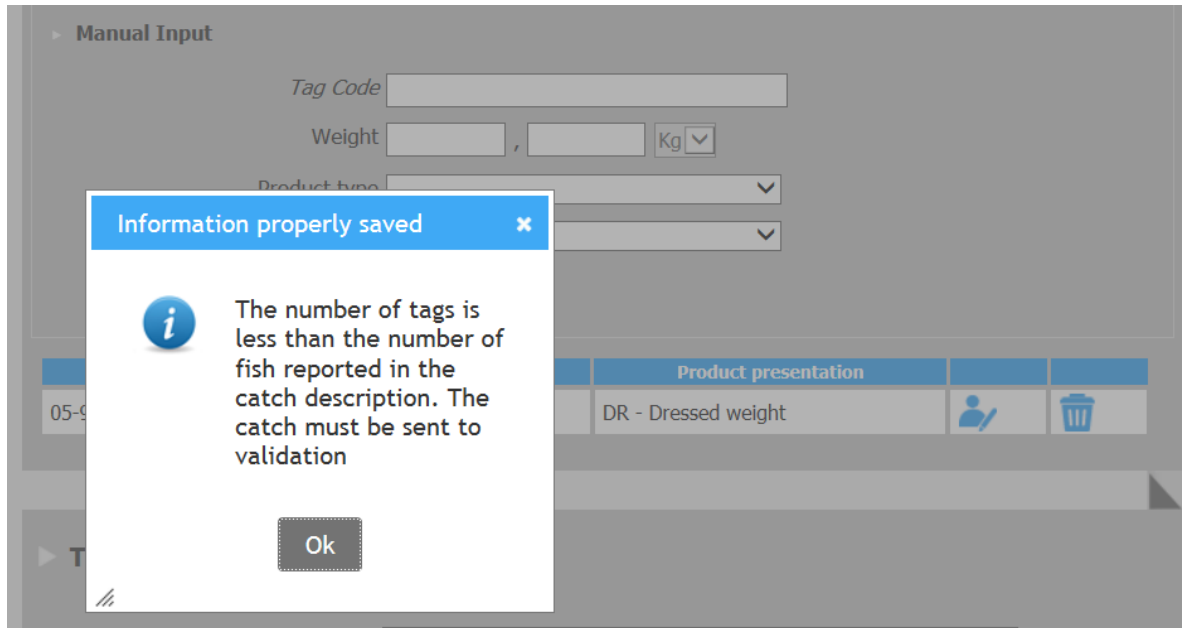

Product presentation

Tag Code	Weight	Product type	Product presentation		
06-0001	110 Kg	F - Fresh	DR - Dressed weight		
06-0002	90 Kg	F - Fresh	DR - Dressed weight		
06-0003	200 Kg	F - Fresh	DR - Dressed weight		
06-0004			DR - Dressed weight		
06-0005			DR - Dressed weight		

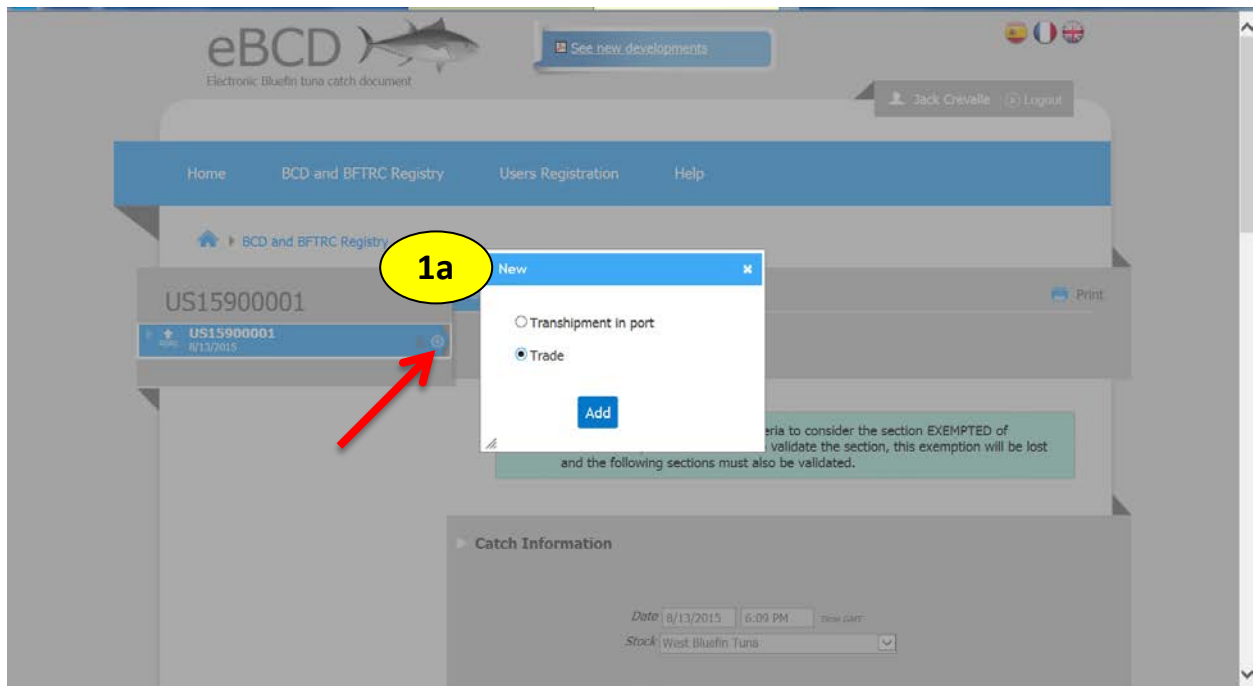

**Alert** ✕

 It's not possible save a eBCD with more tags than number of fishes

You will also receive an alert if you enter tag information for fewer tags than the number of fish you indicated in step 5. In this example, the user entered 2 for the number of fish, but only entered one tag. When you try to save the document, you will receive the below message. If there is not a tag entered for each bluefin tuna, then the eBCD will be sent for validation.

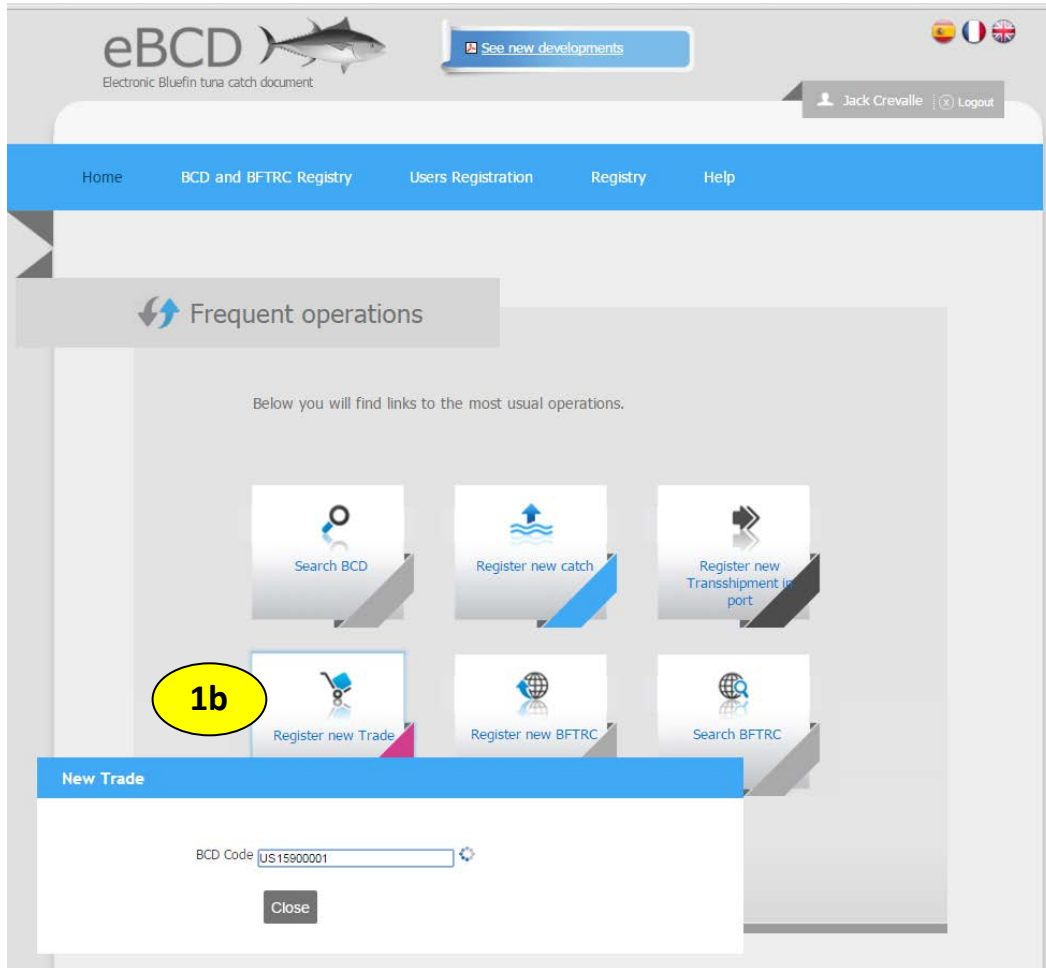

## 7. Add Trade Information to an eBCD for Export

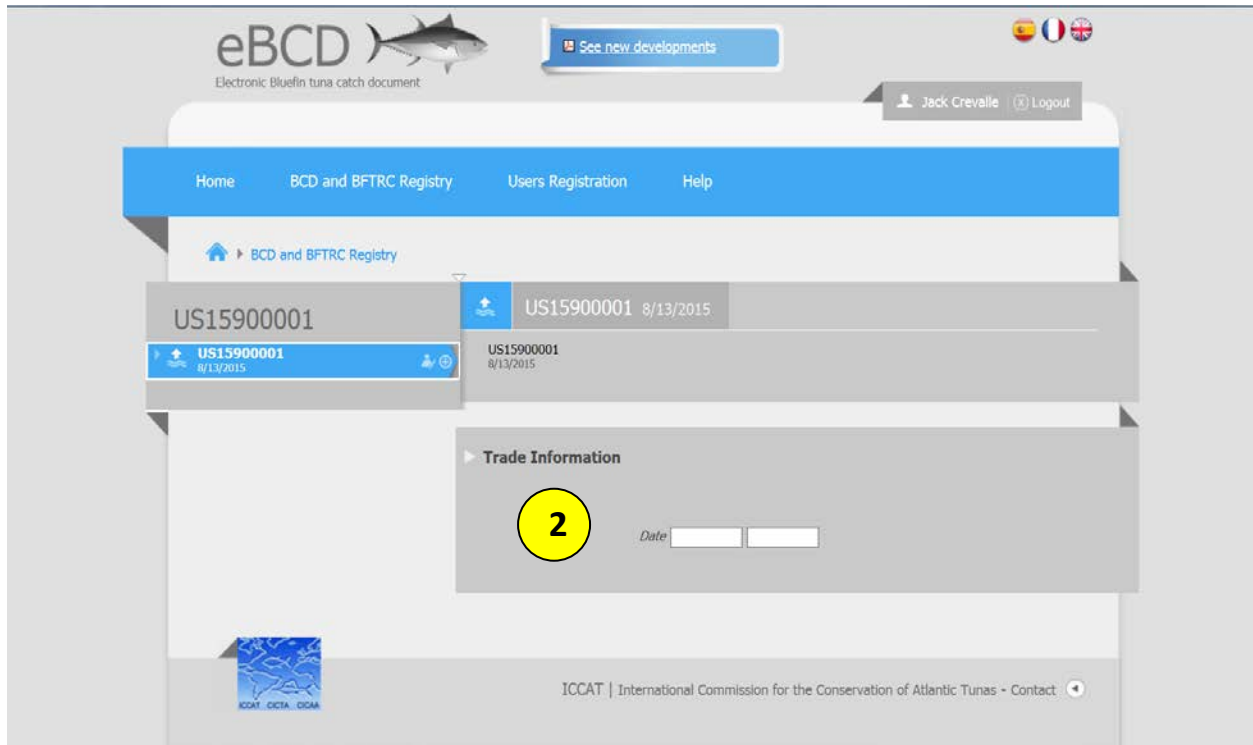

1a. Once you complete and save the catch information in an eBCD, you can add trade information to export bluefin tuna by clicking the + symbol next to the eBCD code. Then select Trade and click Add.

**NOTE: You are free to make edits to the catch section of the eBCD prior to creating the next section, in this case the trade section. Once you initiate the trade section, you will need assistance from Customer Service for any edits.**

1b. You can also add trade information from the home page by selecting “Register new Trade.” Then enter the “BCD Code.”

2. On the next screen, enter the date of trade under Trade Information. Once the date is entered, you will see the below screen.

▶ **Trade Information**

Notes

5. There are two options for completing the Importer/Buyer section:
  - If the buyer of the fish will not be determined until the fish is already in the free trade zone of the state of destination (in this example, Japan), you can leave the Importer/Buyer section blank.
  - If you know the buyer, you can enter the company information (see below). This will allow the buyer to access this eBCD as soon as you save.
    - When you type the first three letters of the company name, a list of potential companies will drop down and you can select the correct company. The address will be automatically populated.

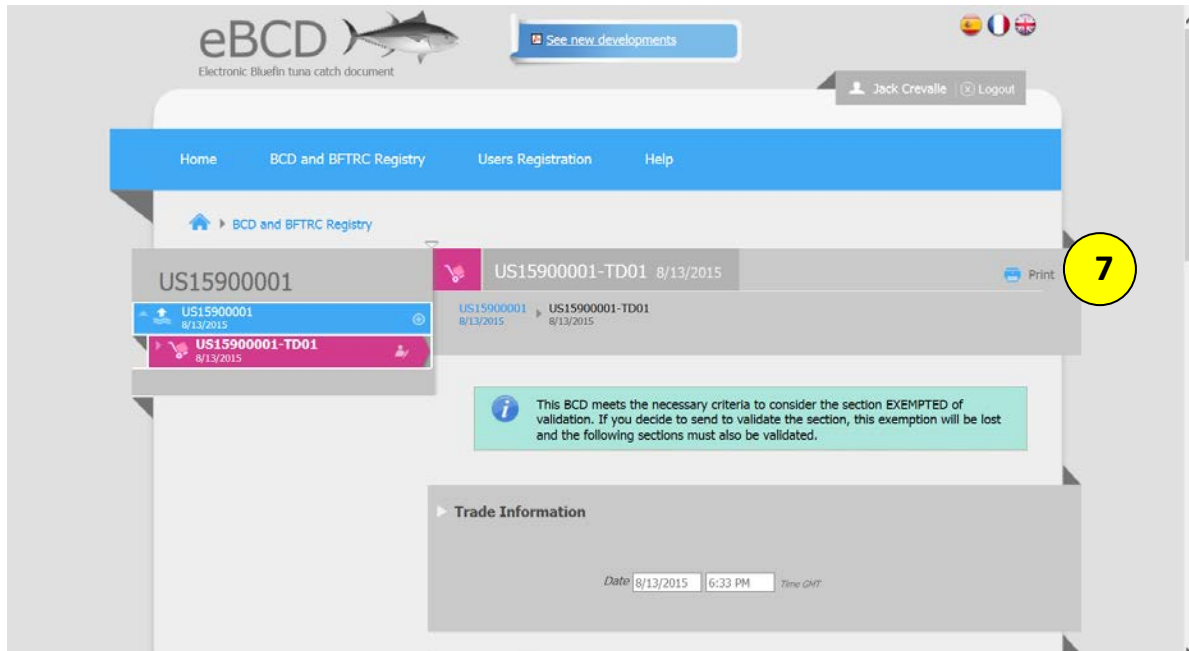

– If the company you are looking for is not listed, you will not be able to enter this information. In that case, the importing country will have to assist the importing company in obtaining the BCD in the system. If you find out who will buy the fish after this document is created and would like to add the Importer prior to its arrival at its destination, for instance in the free trade zone of Japan, you can pull up this document again later and add the Importer or you can request through Customer Service that the Importer be added at the time that decision is made. If you sell fish to another company domestically, this company will need a printed copy of the eBCD with the trade key in order to access the document. You will find the trade key under the “Government Validation” section. In the example of the printed eBCD in step 7 below, you can see the trade key on the right (TtBZNK21L7z1pLi8).

The screenshot shows a form titled "Importer/Buyer". It contains three input fields: "Company" with the value "EAST JAPAN TRADING CO.,LTD", "Address" with the value "FUKUSHIMA-KEN", and "Point of Import/Destination (City,Country,State)" with the value "Tokyo, Japan". A yellow circle with the number "5" is placed over the Company field. Below the form is a "Save" button, with a yellow circle containing the number "6" next to it.

6. Click Save. You will see the below message:

The screenshot shows a confirmation dialog box with a green checkmark and the text "Information properly saved" and "The commercial trade has been properly saved". Below the text is an "Ok" button. The background shows a blurred view of the "Importer/Buyer" form.

- Once you hit OK, you will see the trade section as a part of the eBCD (in pink below).

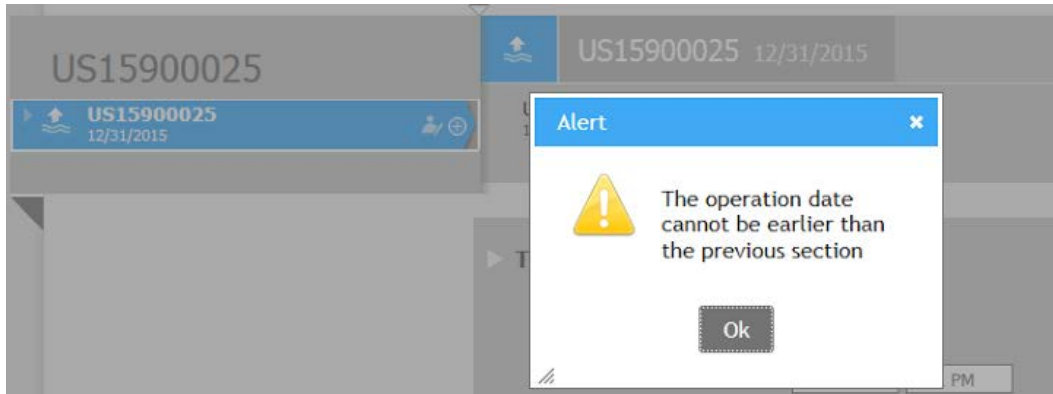

7. You can print your eBCD from this screen for your records. It will appear as below:

1. ICCAT BLUEFIN TUNA CATCH DOCUMENT (BCD)			N°:	US15900001-TD01	1 / 1

## Troubleshooting Potential Errors in the Trade Section

### a) Entering a trade date earlier than the catch date

When entering the date under Trade Information (as in step 2, page 29), the date of trade cannot be earlier than the catch date entered for the eBCD. If you enter a trade date that is earlier than the catch date, you will receive the below error message.

b) Entering the wrong weight under product description

A user might make a mistake entering the weight or presentation of the product, for example by entering the weight in pounds rather than kilograms. In this example, the user incorrectly entered a weight of 600 Kg for fillet (as in step 3, page 30) when the product is actually 300 Kg of loins.

If you enter the wrong information, you can correct your entry by clicking on the edit icon in the table, which looks like a person holding a pen (see below).

The screenshot shows a 'Product description' form with the following fields: 'Product type' (dropdown), 'Product presentation' (dropdown), and 'Weight' (input fields with a unit dropdown set to 'Kg'). Below these fields is an 'Add' button. A table below the form contains the following data:

Product type	Product presentation	Weight		
F - Fresh	FL - Fillet	600 Kg		

Below the table is a 'Total Weight' section with input fields for 'FR' and 'F', with the value '600' entered in the 'F' field. A red arrow points to the edit icon in the table.

The entry will open in the fields above the table.

The screenshot shows the 'Product description' form with the following fields: 'Product type' (dropdown with 'F - Fresh' selected), 'Product presentation' (dropdown with 'FL - Fillet' selected), and 'Weight' (input fields with '600' and '0' entered, and a unit dropdown set to 'Kg'). Below these fields is an 'Add' button. The 'Total Weight' section shows '0' entered in the 'FR' field and '0' in the 'F' field. A red arrow points to the edit icon in the table from the previous screenshot.

You can change the weight and presentation to the correct information and then click + Add.

► **Product description**

Product type

Product presentation

Weight  ,  Kg

Total Weight FR  ,  F  ,

The corrected entry will be added back to the table.

► **Product description**

Product type

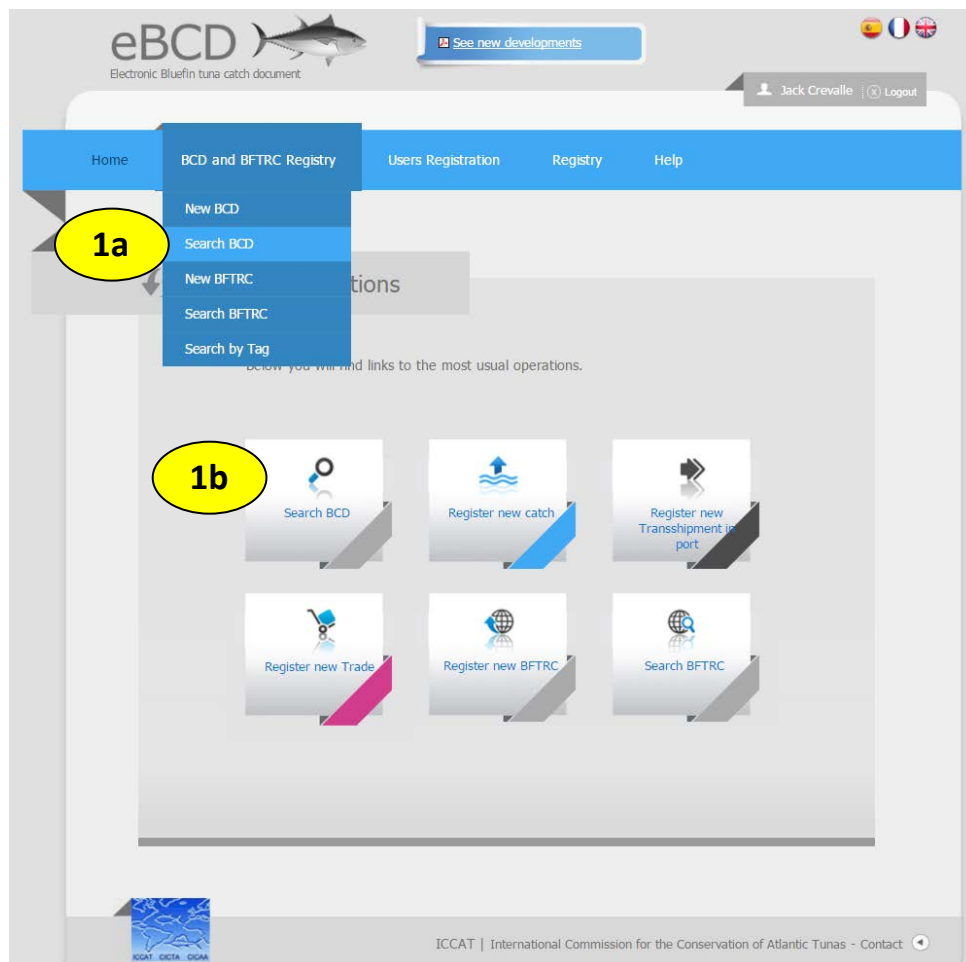

Product presentation

Weight  ,  Kg

Product type	Product presentation	Weight		
F - Fresh	LO - Loins	300 Kg		

Total Weight FR  ,  F  ,

## 8. Open an eBCD from an Import

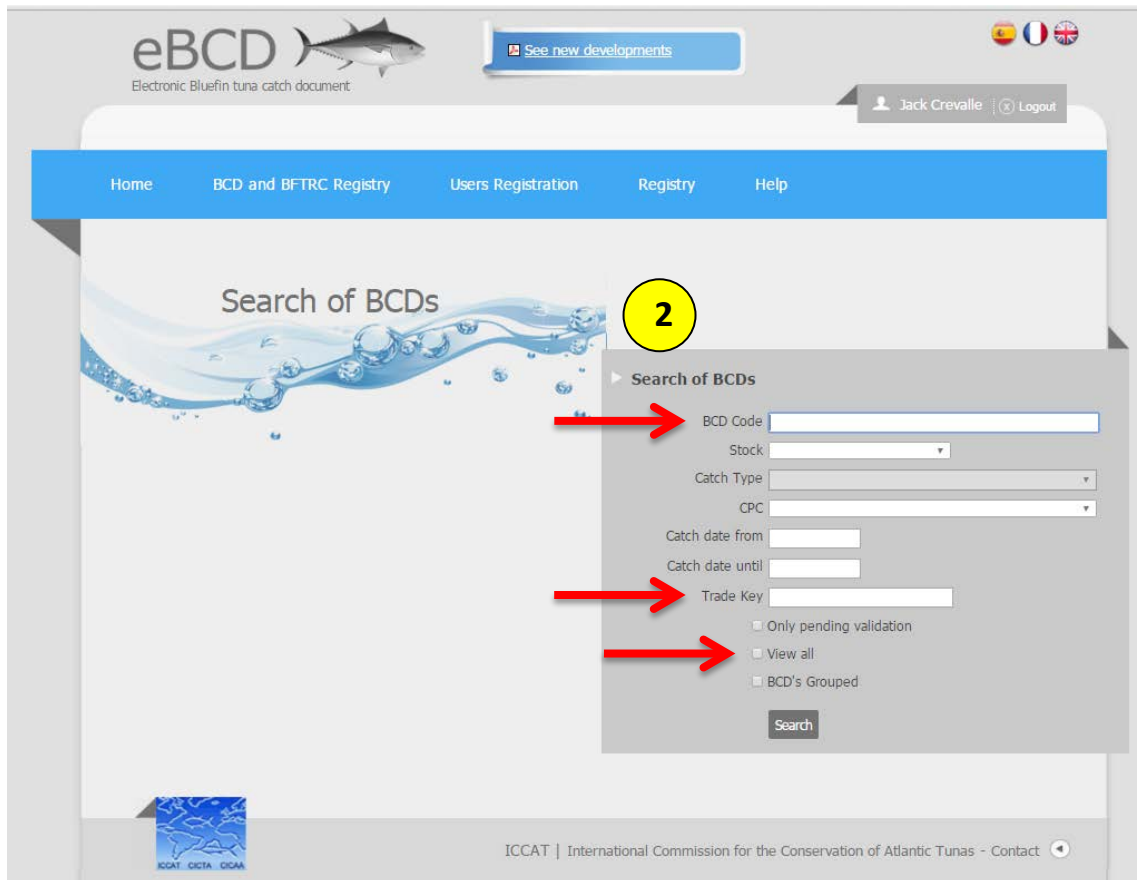

To search for an eBCD from the home page:

1a. Select “BCD and BFTRC Registry.” Then select “Search BCD.”

1b. You can also select “Search BCD” below.

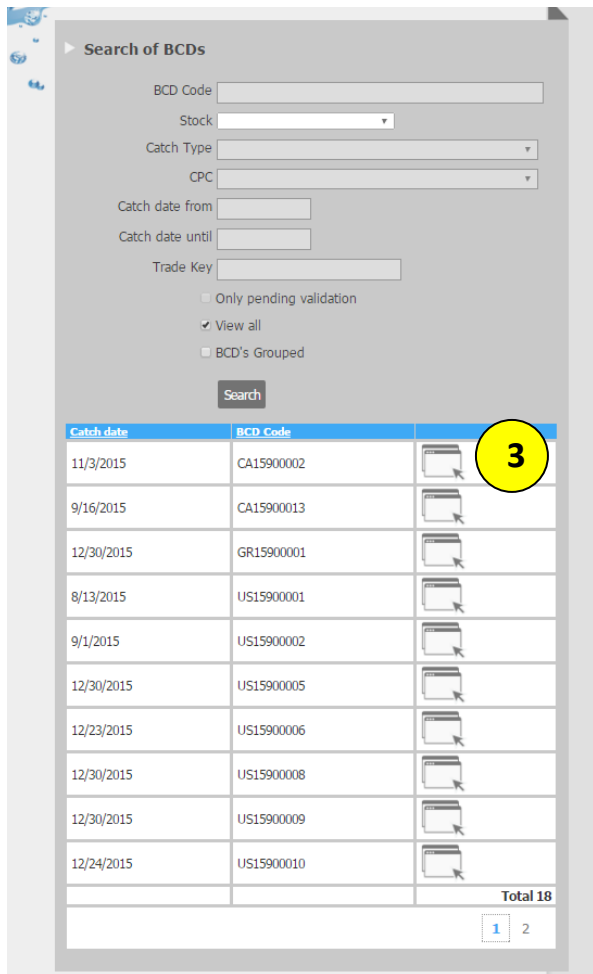

Alternatively, you can also open the eBCD from the link in the email notification sent to you when your company is entered as the importer (see below). When you click the link and log in to the eBCD system, you will be brought to the screen shown below in step 4.

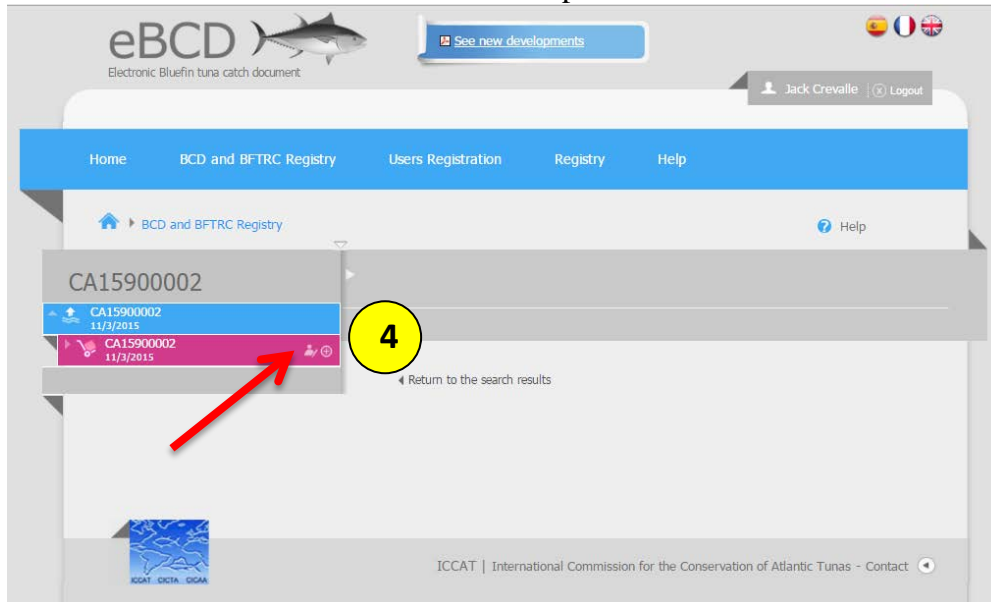

2. On the next screen, you can search for an eBCD by:

- Entering the “BCD Code” provided in your email notification (see previous page),
- Entering the “Trade Key” from a printed eBCD included with the imported product (see step 7, page 33), or
- Selecting “View all” to see a list of your eBCDs (see below).

3. Click on the icon next to the eBCD to open it. You will see the below screen.

4. Click on the edit icon for the trade section in pink to open (see below).

## 9. Create a Re-export Certificate

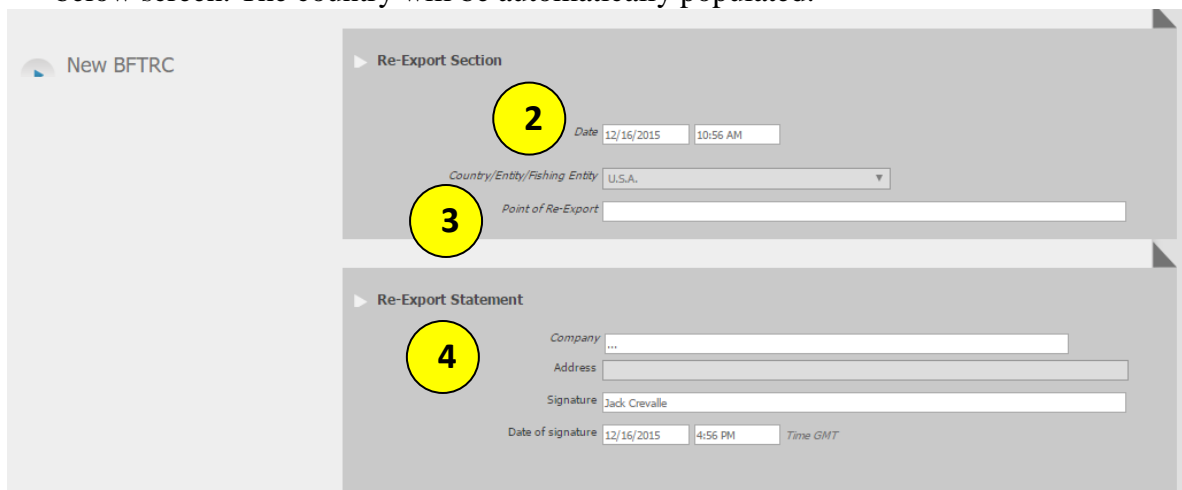

To create a new bluefin tuna re-export certificate (BFTRC) from the home page:

1a. Select “BCD and BFTRC Registry.” Then select “New BFTRC.”

1b. You can also select “Register new BFTRC.”

2. On the next screen, enter the date of re-export. Once the date is entered, you will see the below screen. The country will be automatically populated.

3. Enter the Point of Re-Export.
4. Under Re-Export Statement, enter your company name. When you type the first three letters of the name of the company associated with your user account, your company name and address will be automatically populated (see below). The signature and date of signature will also be populated automatically.

Save

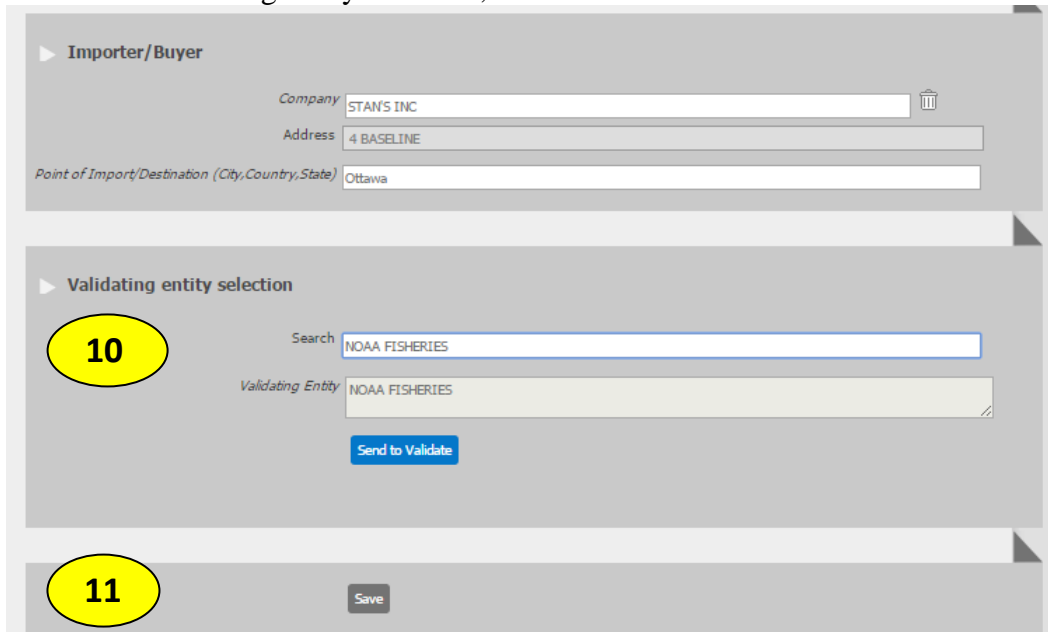

8. Click Save. You will see the below message:

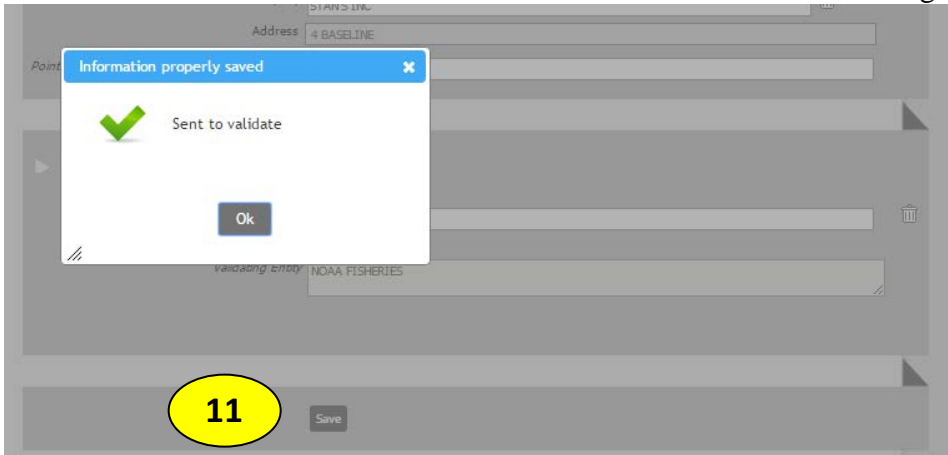

9. Once you hit Ok, you will see an option to send the re-export certificate for validation (see below). Click "Send to Validate."

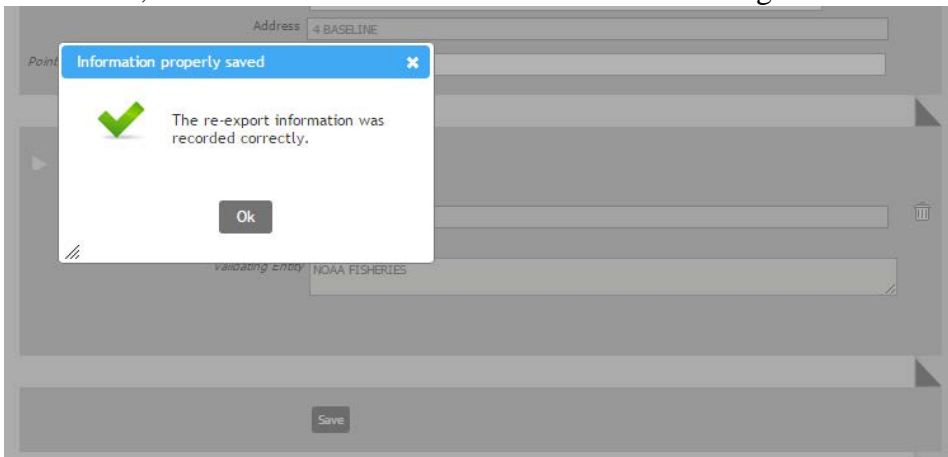

10. Under Validating entity selection, enter NOAA FISHERIES.

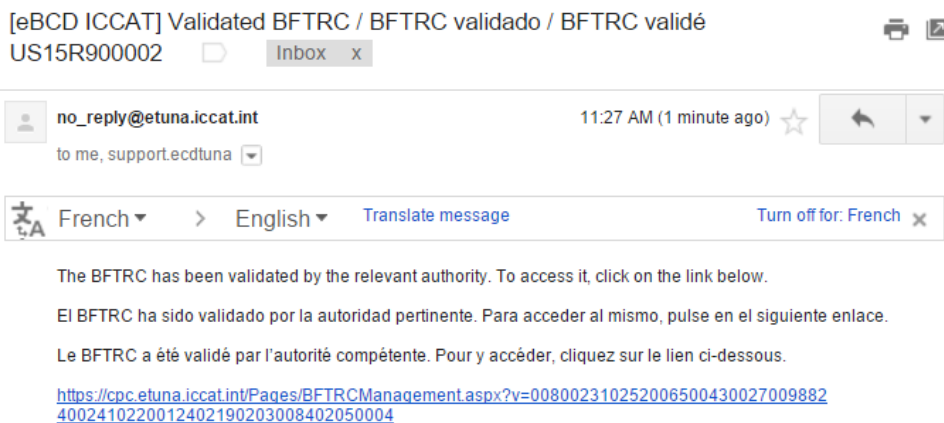

- Click “Send to Validate.” You will see the below message:

11. Hit Ok, then click Save. You will see the below message. Hit Ok.

12. Once the re-export certificate has been validated, you will receive an email notification with a link to view the certificate (see below).

## Re-export of multiple eBCDs

13. Under Description of Imported Bluefin Tuna, select “Create new batch” (see below).

The screenshot shows a form titled "Description of Imported Bluefin Tuna". At the top, there are three checkboxes: "Existing Batch" (unchecked), "Create new batch" (checked), and "Single BCD/BFTRC" (unchecked). Below these are three input fields: "Batch" (empty), "Imported BCDs / BFTRCs" (empty), and "Trade Key" (empty). A "Search" button is located at the bottom of the form. A yellow circle with the number "13" is overlaid on the "Create new batch" checkbox.

- Enter the Batch name.
- Enter the first eBCD code in the batch under “Imported BCDs/BFTRCs” (CA15900018 in this example) OR enter the Trade Key from a printed eBCD.
- Click Search.
- The eBCD will appear in a table (see below).

The screenshot shows the same form as above, but now the "Batch" field contains "12312015" and the "Imported BCDs / BFTRCs" field contains "CA15900018". The "Search" button has been clicked, and a table titled "Imported BCD and BFTRC" is displayed below. The table has one row with the text "CA15900018(TD) - 11/10/2015" and a checked checkbox. A "+ Add" button is located below the table. A yellow circle with the number "13" is overlaid on the "Create new batch" checkbox.

Imported BCD and BFTRC	
CA15900018(TD) - 11/10/2015	<input checked="" type="checkbox"/>

- Check the box in the table next to the eBCD code.
- Click + Add.
- The selected eBCD will be linked to your re-export certificate (see below).

## 10. Additional Resources

To access additional resources provided in the eBCD system, such as videos, user manuals, and templates, click on Help.

The screenshot displays the eBCD system interface. At the top left, the logo "eBCD" is accompanied by a fish icon and the text "Electronic Bluefin tuna catch document". A blue button labeled "See new developments" is positioned to the right. In the top right corner, there are flags for Spain, Italy, and the United Kingdom, along with a user profile for "Jack Crevalle" and a "Logout" link. A blue navigation bar contains the following menu items: Home, BCD and BFTRC Registry, Users Registration, Registry, and Help. A red arrow points to the "Help" menu item. A dropdown menu is open under "Help", showing three options: "Help Videos", "Documents and Manuals", and "Templates". Below the navigation bar, the main content area is titled "Help" and contains the text: "Documentation Centre concerning the eBCD system. On this page you will find all the help and documentation required for proper use of the application." The page is divided into two main sections: "Video Help" and "Documents and manuals". The "Video Help" section features a large video player with a play button and the title "Add a new trade section - 3:53 min". Below the video player, there are two video thumbnails. The first is titled "Add a new trade section" and is described as a "Video explaining how to add a trade of dead BFT to a BCD", with a duration of 3:53 min and a "View Video" button. The second is titled "Add a new transhipment" and is described as a "Video explaining how to add a new transhipment section", with a duration of 3:02 min and a "View Video" button. The "Documents and manuals" section is titled "User manuals" and contains a document titled "Handbook Catch Responsible" with the subtitle "Manual for the Responsibles for catch". A "Download" button is located below the document title.
