

spawners need clean gravel & plenty of room to nest

parr need pools, shade, places to hide & lots of bugs to eat

returning adults need clear & safe passage upstream  
places to rest & hide on the way home

carcasses fertilize the stream

smolts need fast, safe passage to the estuary

places to hide & eat

juveniles in the estuary need safe passage out to the ocean

adults in the ocean need krill, squid & small fish to eat

# THE LIFE OF A SALMON

## What do Salmon need?

## How can we protect Salmon?

**At every life stage, Salmon need abundant, clean, cold water to live.**
